SUMMARY

Software Engineering student at Mehran University of Engineering & Technology, SZAB Campus, currently in the 3rd semester. I work with Python and Java and enjoy building practical software projects, solving problems, and working with databases. I am also developing my data analytics skills through SQL, Excel, data handling, and visualization tools.

EDUCATION

Bachelor of Engineering in Software Engineering | 3rd Semester

- CGPA in 1st year: 3.47/ 4.0, ranked in top 10 of Batch
- Main coursework: IICT, PF, OOP, ISE, DSA, DBMS, SRE, OS, SDA, CN, IS, SCD, DS, MAP, SR, CALD, SQE, CC

TECHNICAL SKILLS

Programming: Python, Java, C++ (fundamentals)

Database & SQL: SQL, Oracle Database, relational database concepts

Data Analytics: Microsoft Excel, Power BI, data cleaning and visualization concepts

Libraries & Tools: NumPy and Pandas (learning/practice), Git, GitHub, VS Code, Oracle SQL Developer

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, debugging, problem-solving

PROJECTS

Hospital Management System | Software project

- Academic project focused on organizing hospital-related information and supporting common management tasks.

Library Management System | Java, OOP

- Java lab project designed to manage library records and basic library operations using object-oriented programming.

Digital Airline Reservation System | Java / VS Code

- Developing a multi-class reservation application with login/logout flow and core airline booking features.

ACTIVITIES & ENGAGEMENT

- Volunteer, Open HACK 25 — participated in a university hackathon environment and collaborative technical activities.
- Google Developer Group (GDG), university community — involved in developer learning and community activities.
- Interested in Python development, databases, and building a career in data analytics and data science.
